

FLIGHT NUMBERS EXPLAINED IN DETAIL

== SPEED

Speed ratings are listed from 1 to 15. Discs with a higher speed cut through the air better.

== GLIDE

Glide range from 1 to 7. A disc with more glide is able to better maintain loft during flight.

== TURN

High speed turn is between -5 and 1. A disc with low turn has a tendency to turn right when thrown backhanded by a right-handed player.

== FADE

Low speed fade is listed from 0 to 6. A disc with high fade will tail off left at the end of the flight when thrown backhanded by a right-handed player.
