LATITUDE 64° IS THE GEOGRAPHICAL LOCATION OF BERGSBYN (MEANING MOUNTAIN VILLAGE), A SMALL RESIDENTIAL COMMUNITY OUTSIDE THE COASTAL CITY OF SKELLEFTEÅ, NEAR THE ARCTIC CIRCLE IN THE NORTH EASTERN PART OF SWEDEN.

HERE A FEW OF THE EXPERIENCED PLAYERS AND DEVOTED ENTHUSIASTS HAD THE *DREAM, DESIRE* AND *VISION* TO DEVELOP AND PRODUCE *DISC GOLF PRODUCTS* THAT WOULD ELEVATE THE SPORT WE ALL LOVE TO NEW HEIGHTS IN TERMS OF QUALITY AND CLASS. THE PASSION FOR THE SPORT IS ALWAYS IN THE FORE-FRONT OF EVERYTHING LATITUDE 64° MANUFACTURES, BUT ALSO THE DETERMINATION TO OFFER A *WIDE VARIETY OF PRODUCTS* THAT WILL SUIT ALL TYPES OF PLAYERS, FROM THE FLEDGLING BEGINNER TO THE AVID PROFESSIONAL.

MISSILEN

Missilen (The Missile) features hexagon shaped cavities in the top surface and the bottom of the rim. This pattern has been tested to be the most efficient in reducing drag and generating an extremely fast flight. The speed is especially notable when the disc lands. Try it yourself and see exactly how fast this thing is.

SPEED: 15 | GLIDE: 3 | TURN: -0.5 | FADE: 4.5

RAKETEN

Raketen (The Rocket) is an extremely fast long distance driver. The unique hexagon pattern makes the disc less affected by air drag and it will maintain its speed for a longer time compared to discs without HEX pattern. Raketen is a good choice for the average discgolfer looking for a disc with maximum speed.

SPEED: 15 | GLIDE: 4 | TURN: -2 | FADE: 3

BALLISTA

Tired of choosing between speed and accuracy? With the Ballista you can get the best of two worlds. One of the fastest discs in the world combined with a dependable flight path makes the Ballista a must-have in your bag. It will be overstable for beginners and slightly understable for experienced players.

SPEED: 14 | GLIDE: 5 | TURN: -1 | FADE: 3

BALLISTA PRO

2018 RELEASE

Ballista Pro is the big brother to the Ballista, with added stability for experienced players. It is the perfect solution if you are looking for a distance driver that can navigate tight fairways. With a great combination of speed, stability and glide it is the go-to disc for all kinds of distance shots.

SPEED: 14 | GLIDE: 4 | TURN: 0 | FADE: 3

KNIGHT

When speed is of the essence the Knight will ride with haste. This high speed driver features one of the widest rims yet on a golf disc. The Knight is extremely fast but also has great glide considering the wide rim, so this disc can ride for long distances. For drives around 330 ft it will be slightly understable.

SPEED: 14 | GLIDE: 4 | TURN: -1.5 | FADE: 3

HALO

Halo is a high speed long range driver with excellent speed and distance. A perfect fit in many players bags, from pros to amateurs. At a 330ft toss it will be stable and consistent.

SPEED: 13 | GLIDE: 5 | TURN: -0.5 | FADE: 3

CUTLASS

The Cutlass is a cutting edge distance driver. With good speed, good glide and a predictable fade, it is a sharp weapon on the disc golf course. For beginners it will be very overstable, thus a great disc to fight the wind. For players with more arm speed this disc will be a fast, stable and trustworthy driver – an ancor in any disc golf bag.

SPEED: 13 | GLIDE: 5 | TURN: 0 | FADE: 3.5

STILETTO

Overstable! That's the main word when describing the Stiletto. The Stiletto was designed based on feedback from pro disc golfers who wanted a disc so overstable that it could hold up to anything. When you are standing on the tee and the wind roars in your face, you will be relieved to find this disc in your bag. When the storms are gathering – trust the Stiletto.

SPEED: 13 | GLIDE: 3 | TURN: 0.5 | FADE: 5

GLADIATOR

Heading for the drawing board when designing the high speed Gladiator, we sought for superior glide and distance, along with overstabity to make it a true companion for the pros. Made in collaboration with David Feldberg.

SPEED: 13 | GLIDE: 5 | TURN: 0 | FADE: 3.5

HAVOC

Havoc is a high speed driver that will give you the distance you need on the course as it never seems to slow down. It is easy to throw and will fit advanced and pro players.

SPEED: 13 | GLIDE: 5 | TURN: -1 | FADE: 3

BOLT

This is one of our more understable distance drivers. It is almost as fast as a lightning bolt and has an understable flight path with good glide. This is the perfect distance driver for players with slower arm speed that want to throw far. For experienced players with more power, the Bolt can still be useful when fast and understable is what you are looking for.

SPEED: 13 | GLIDE: 6 | TURN: -2 | FADE: 3

SCYTHE

This disc will slice through the air like a sharp scythe slices through grass. The Scythe is not made for smooth anhyzers. It is an overstable and very reliable high speed driver, produced for the experienced players that need a disc to deliver speed, control and a strong fade.

SPEED: 12 | GLIDE: 3 | TURN: 0 | FADE: 4

FLOW

A high speed driver with a mix of good speed and excellent glide. With a dependable flight path and low fade, it is best described as a faster fairway driver. It has a domey top which gives it good lift and glide. The rim is quite sharp and wide (22mm), but it has a comfortable grip. Try it in a tailwind and you will get some serious distance.

SPEED: 11 | GLIDE: 6 | TURN: -0.5 | FADE: 2

CULVERIN

Have a blast with this overstable fairway driver. A lot of fairway drivers fly too straight, and a lot of them are too overstable. The Culverin fits right between those two segments. For the advanced and pro players the first part of the flight will be straight and it will finish with a dependable fade. If you are looking for a dependable fairway driver that you still can get some decent distance out of, Culverin is the answer. Aim, shoot, hit your mark.

SPEED: 9 | GLIDE: 5 | TURN: -0.5 | FADE: 3

ZION

Zion is a stable fairway driver made in our overmold technology called 2K. With a good amount of speed and perfect balance in stability it will be a trusted control driver. The flat profile will suit forehand players well. This overmold disc has an Opto Line flight plate and a Gold Line rim.

SPEED: 9 | GLIDE: 4 | TURN: -0.5 | FADE: 3

FURY

The Fury is a control driver in our beginner friendly segment. It is understable, glidey and a great step up for players that have used our Diamond, and is in need of a bit more stability. It is also a great roller choice for more experienced players.

SPEED: 9 | GLIDE: 6 | TURN: -2 | FADE: 2

BRYCE

Bryce is an understable fairway driver with great glide and speed compared to other discs in the category. It is a great allround driver that will help you save shots on a daily basis. This overmold disc has an Opto Line flight plate and an Gold Line rim.

SPEED: 9 | GLIDE: 6 | TURN: -2 | FADE: 2

SAINT

Saint is a highly praised control driver – both among amateurs and pros. When you need a disc with good distance and perfect accuracy the Saint will deliver. Saint will be a straight shooter for drives up to 350 ft and has excellent glide. Saint also has a big brother – the slightly more stable Saint Pro.

SPEED: 9 | GLIDE: 7 | TURN: -1 | FADE: 2

SAINT PRO

Saint Pro is the big brother to the Saint with added stability for the more experienced player. While more overstable, it maintains the good glide and controllable flight characteristics of the regular Saint. For players with good arm speed, this fairway driver is a must have.

SPEED: 8 | GLIDE: 5 | TURN: -0.5 | FADE: 2

STRIKER

Control is the key word for this disc! The Striker is perfect for accurate drives; either it's left, right or straight. The excellent balance of this driver makes it suitable for most players. The flight at a 330ft drive is neutral with a very small fade at the end of the flight path.

SPEED: 8 | GLIDE: 5 | TURN: 0 | FADE: 2

FALCHION

Scary fairways where you need perfect accuracy and a good amount of distance? Cut through the air with Falchion! For drives around 300 ft it will hold a soft anhyzer and slowly fight its way back to a small fade. This disc is a great step up for beginners who have gained some driving power and feels that discs like Diamond, Jade and Fury are too understable.

SPEED: 8 | GLIDE: 5 | TURN: -1 | FADE: 2

RIVER

River is one of our most popular discs of the past decade, probably due to its tremendous GLIDE. The River is a fairway driver for those accuracy shots that demands good control. It is easy to throw and fits most player's power and skill levels. With small fade and amazing glide, you can really let it fly on those big anhyzer curves.

SPEED: 7 | GLIDE: 7 | TURN: -1 | FADE: 1

RIVER PRO

The Pro version of the popular River. With added stability, the River Pro will be a versatile and trusty fairway driver with a slow and steady fade.

SPEED: 7 | GLIDE: 5 | TURN: 0 | FADE: 2

MAUL

The Maul is a fairway driver made for turnover shots. It resembles our popular River, in both speed and glide but is more understable. This disc is a very good choice for beginners and amateurs, since it is easy to grip and control, and won't fade as much as high speed drivers.

SPEED: 7 | GLIDE: 7 | TURN: -2 | FADE: 1

XXX

XXX is our extra overstable control driver. This disc is certainly a disc for the "big guns" and not for kids. It is a headwind driver that you will love to have in the bag when you need to bomb over obstacles. XXX is a disc you can rely on in any condition and on any day! Do you have the power to shine with an X-rated disc? If so, good for you!

SPEED: 7 | GLIDE: 3 | TURN: 0 | FADE: 4

SPARK

Control and stability, that is what the Spark is all about. Designed to be the workhorse for accurate fairway drives, you can rely on the Spark's dependable fade and stable performance in the air. The Spark is useful in many ways and is perfect for thumbers and forehand shots. The Spark was designed in cooperation with pro disc golfer David Feldberg.

SPEED: 7 | GLIDE: 4 | TURN: -0.5 | FADE: 3

SAXON

2018 RELEASE

2K Fairway Driver. Saxon will be the Latitude 64° edition for the 2018 Trilogy Challenge. Regular release planned for fall of 2018.

TBD

EXPLORER

2018 RELEASE

Straight flight path and controlled glide, that's what the Explorer brings. Designed to be the workhorse for all kinds of accurate fairway drives, this stable and versatile fairway driver has been developed in cooperation with World Champion **Ricky Wysocki**. "The Explorer is smooth out of the hand and has a clean stable flight. It goes right where I want it" – Ricky Wysocki.

SPEED: 7 | GLIDE: 5 | TURN: 0 | FADE: 2

RICKY WYSOCKI | TEAM LATITUDE 64°
2016 & 2017 WORLD CHAMPION

ANCHOR

Back in the day we used a lot of putters and midranges for our drives, and still feel that many players could benefit from this line of thinking. The Anchor is a reliable overstable midrange with a slight dome and big bead. Maximize your fairway hits by picking up an Anchor today.

SPEED: 5 | GLIDE: 4 | TURN: 0 | FADE: 3

MACE

Mace is the midrange for the masses. It was co-designed with pro disc golfer David Feldberg and is a solid mid-range solution for almost every situation. The Mace can handle a big arm and also be controlled by players with less power. It will hold a hyzer line, fly reliably straight or work it's way back on a long anhyzer drive.

SPEED: 5 | GLIDE: 5 | TURN: 0 | FADE: 2

COMPASS

Navigate the fairways with the Compass. This straight flyer will go wherever you need it to go, and holds any line in a predictable way. Not shallow, not deep, this disc will fit in any hand. The Compass has been developed in cooperation with World Champion Ricky Wysocki: "The Compass will make me more confident on the course. Hyzer, straight, anhyzer; I can trust it on every angle".

SPEED: 5 | GLIDE: 5 | TURN: 0 | FADE: 1

GOBI

Slightly understable midrange for those long sweeping anhyzers. It will fight back to a reliable fade towards the end of the flight. Great for players with moderate arm speed that needs a controllable disc, but also for bigger arms looking for controlled hyzer flips. This overmold disc has an Opto Line flight plate and an Gold Line rim.

SPEED: 6 | GLIDE: 5 | TURN: -0.5 | FADE: 1

CORE

Core is a perfect midrange for both amateurs and professional players. The flight is reliable and stable, with a slight fade at the end. With its predictable flight path, it can be used for hyzer shots as well as long turnover drives.

SPEED: 6 | GLIDE: 5 | TURN: -0.5 | FADE: 1

CLAYMORE

The Claymore has a small dome and comfortable grip combined with a neutral flight that will suit most players. Straight, left or right, doesn't matter. This disc can do it all.

SPEED: 5 | GLIDE: 5 | TURN: -1 | FADE: 1

FUSE

FUSE is the most versatile midrange driver we have ever made. Period. Co-designed with our pro Jesper Lundmark, it has a stable and predictable flight path up to 300ft, and will hold long anhyzer curves with a minimal fade at the end.

SPEED: 5 | GLIDE: 6 | TURN: -1 | FADE: 0

FUJI

2018 RELEASE

2K Midrange. Fuji will be an overstable midrange and is planned for release during the spring of 2018.

TBD

DAGGER

The Dagger is a deep dish beaded putter developed in co-operation with Dave Feldberg. It is also the putter of choice for 2x World Champion Ricky Wysocki on Team Latitude 64°.

SPEED: 2 | GLIDE: 5 | TURN: 0 | FADE: 1

MERCY

Sometimes the disc golf course shows you no mercy. You might have better luck with the Mercy from Latitude 64°. The deep rim gives it a stable and consistent slow flight, perfect for putting, approach shots and short drives.

SPEED: 2 | GLIDE: 4 | TURN: 0 | FADE: 1

SPIKE

The Spike will fly straight for beginners and will have a more understable flight path for the more advanced players. Compared to most putters, it has a shallower grip and a smoother edge. The top surface has traction zones for optional varied grip.

SPEED: 4 | GLIDE: 1 | TURN: -1 | FADE: 1

PURE

The Pure is a modern classic in the putt and approach department. The disc was co-designed with Jesper Lundmark and features a comfortable grip and a medium deep rim, with minimum fade for the ultimate putting experience. Left, straight or right; it will hold any line on your approach shots. Elevate your game around the basket with the Pure.

SPEED: 3 | GLIDE: 3 | TURN: -1 | FADE: 1

MACANA

The Macana is a putter for players that like a beaded deep rim putter. Stable in flight, it will serve you well as both a putter and a short range driver with it's good glide and slight fade. The name Macana refers to old wooden weapons used by native cultures of Central and South America. If you feel like every green is a constant battle ground perhaps the Macana can help you win the fight!

SPEED: 2 | GLIDE: 5 | TURN: 0 | FADE: 1

GAUNTLET

Are you searching for a reliable putter with stable flight? Then it is time to challenge the course with the Gauntlet. A high profile putt and approach disc with a beaded rim, good glide and stable flight path, makes for a handy weapon in every bag.

SPEED: 2 | GLIDE: 4 | TURN: 0 | FADE: 1

SAREK

Whatever situation you find yourself in on the course you can always fall back on the Sarek. It's a reliable, stable, putt and approach disc that works very well as a short range driver too. No matter if you are new to the game or a seasoned pro, you can find many ways to put this disc to good use. This overmold disc has an Opto Line flight plate and an Gold Line rim.

SPEED: 2 | GLIDE: 4 | TURN: 0 | FADE: 1.5

CALDROP

Stepping up to make an important upshot, putt or short drive, and feel the wind messing with your head? Grab the Caltrop and feel your confidence return. The Caltrop is a throwing putter with raised thumb grip and a solid overstable flight that will help you make those critical shots to stay in the lead.

SPEED: 2 | GLIDE: 2 | TURN: 0 | FADE: 2

SINUS

Sinus is a putter with three different textured grip areas on top. This gives players an option to find a grip they feel most comfortable with. Between the grip areas the disc has a regular surface for players who prefer a smooth grip. The flight is quite overstable making it useful in windy conditions.

SPEED: 2 | GLIDE: 2 | TURN: 0 | FADE: 2

JADE

The Jade is designed to be a little more stable for players who loved the Diamond, but as their game developed needed a disc that could handle a bit more speed. It sits very comfortably in the hand, with a good tactile feel to the plastic and it holds the angles well. You CAN turn it over but unless you really force it, it fades back at the end. A very nice, reliable, and moderately stable disc.

SPEED: 9 | GLIDE: 6 | TURN: -2 | FADE: 1

DIAMOND

Diamond is the choice of disc for beginners, children and players with moderate arm speed. It is only produced in weights between 145g-159g, which makes it easy to throw and control. It has an understable flight path with good glide and slight fade.

SPEED: 8 | GLIDE: 6 | TURN: -3 | FADE: 1

PEARL

Pearl is a midrange with a small grip, low weight starting at 150g and a neutral flight path. It is part of the Easy-to-use line and is the perfect midrange for beginners, children and players with moderate arm speed.

SPEED: 4 | GLIDE: 6 | TURN: -4 | FADE: 0

RUBY

Ruby is the putt & approach disc in our very popular Easy-to-use line. It features a small grip, low weight starting at 150g and a neutral flight path.

SPEED: 3 | GLIDE: 5 | TURN: -3 | FADE: 1

PLASTIC TYPES

opto™ LINE

Standard plastic for all drivers and midrange.

Made out of some of the world's most durable plastics. It comes in a variety of beautiful translucent colors. The Opto Line plastic has been developed to withstand severe punishment and extreme conditions better than other plastics.

gold™ LINE

Standard high end plastic for all midrange and drivers.

Gold Line is our premium blend plastic. The start of the mix has been the same brand plastics used in Opto Line but we added a different polymer to give it better grip without losing the excellent durability of Opto Line.

zero LINE

Standard plastic for all putters.

Zero Line is the grippy putter plastic used in our putters and approach discs. It is chosen for the good grip and feel you need in your short game. With three different stiffness levels (**Soft, Medium, Hard**) you will surely find your favorite.

**FIND YOUR
FAVORITE**

Glows in the dark.

For a few selected disc models in Opto plastic, we have added a translucent material for will glow in the dark effect. When playing disc golf during night time all you need is to pick up your flashlight, or any other strong light source, and charge up the glow properties of the plastic, making it easier to find your disc even on nights when the moon doesn't shine.

RETRO LINE

Most affordable – easy to brake in.

This is our most affordable plastic. It is also about nostalgia. The mid 80s was a great time. For a long time we have had requests that we should make discs that could be broken in more easily. Test after test led us to this new plastic blend that we have named Retro.

Recycled discs.

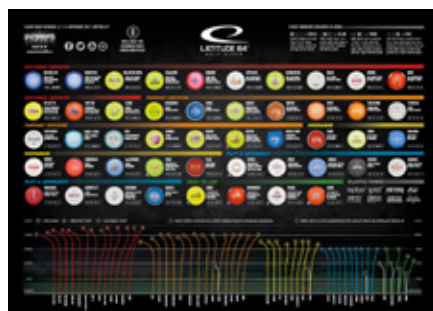

This is a mix of reprocessed material from Opto and Gold Line discs that have come up short during quality control. Recycled discs are usually slightly less stable than Opto and Gold discs. They also break in a bit faster.

Light weight discs.

Opto Air uses the same material as our durable Opto Line plastic. It is modified and the runs are done in a different way to achieve lighter weight discs.

BITE

Do you want a dog disc that can take a beating? Look no further. The Bite is the latest in dog disc technology to hit the canine sports arena. Using experience from production of the world's premiere disc golf products, Latitude 64° has developed the Bite for all dogs and dog owners in need of a disc that can handle a beating. A reliable neutral flight, combined with puncture resistant material has deeply impressed Latitude 64's test panel. Try it out yourself and prepare to be amazed!

Weight: Approximately 150g

BITE PUPPY

This is the smaller version of the Bite. Perfect for you and your small canine friend. You can throw it with ease due to the lighter weight. Still it features the same good qualities as its big brother: Super durable, puncture resistant and with a controllable flight path.

Weight: Approximately 90g

MARVEL AVIATOR

(BY DYNAMIC DISCS)

The Ultimate hero meets the disc for Ultimate and the only disc that is approved by Captain America. In the same way that the Cap flings his shield in defense of what is true and good, you can now do the same in your yard, at the park, or on the field. Great grip, incredible glide, and unmatched durability will ensure that the Captain America Aviator is flying by your side perfectly for years to come. Back-hand, forehand, or any other throw you decide, this shield will go where you command. Gather all who want to have fun and begin working on that perfect throw.

Weight: 175g

AVIATOR

(BY DYNAMIC DISCS)

A disc in flight is a beautiful thing. A pinpoint pass to a sprinting teammate over the outstretched defender is magical. The Aviator looks to bring these highlights to your regular game. Specifically crafted to glide further and straighter, the Aviator will do both of these longer than any other disc on the market.

Weight: 175g

CATCH

Catch from Latitude 64°. It will evolve the sport of Ultimate just like Latitude 64° golf discs has helped several players become World Champions. Compared to older Ultimate discs it will fly straighter and longer with more glide and control. On top of that it is extremely durable with a great feel. So if you and your team is looking for the best disc money can buy, this is the Ultimate Catch!

Weight: 175g

We offer custom discs for clubs, tournaments, dealers, companies and special events. The minimum order for custom hot stamping is 50 discs per disc model. It is important to plan and order early due to the lead time of around 3-4 weeks in Europe. Custom stamping for the U.S. market is handled by Dynamic Discs. Lead times vary depending on what mold you are looking for and what our inventory status is of that disc.

There is also the more exclusive option of ordering your custom stamp as a DecoDye print. This gives almost infinite possibilities and the full color end result highly depends on the quality of art work you provide for us.

More info can be found at: www.latitude64.se/order/custom/

TOURNAMENTS · CLUBS · RENTAL DISCS · CORPORATE

DecoDye is a process where we use 8 variations of ink to transfer any original image to a disc of your choosing. The best results are achieved using white discs as a neutral canvas for your artwork. The finished disc will have a lasting image that penetrates the surface of the plastic and as a result will not give the feeling of a thin layer of ink which is the case with some other processes used in the Disc Golf industry.

DecoDye can be used on all our premium plastics with the same great result, but it will always look best on white discs made out of the popular Gold Line plastic.

More info can be found at: www.latitude64.se/order/custom/

DG LUXURY E3

We take disc golf gear serious. And if you take disc golf serious this is the bag for you. Made out of sturdy nylon fabric with artificial leather details and embroidered logos, it is both practical and beautiful to behold. The DG Luxury Backpack is made to carry approximately 20 discs, but it can carry 30 if all compartments are used for discs.

FEATURES:

- Pocket holder for bottles up to 1.5L.
- Front pocket suitable for towels or gloves.
- Side pocket for wallet, keys, etc.
- Two side pockets, one on each side for rule book, nuts, candy, or other things needed for long rounds and tournaments.
- Large side pocket behind the putter pocket, suitable for backup discs.
- Large top pocket for extra water, rain gear.
- Putter pocket on the side with room for two putters.
- Mini disc slot outside the putter pocket.
- The lid that closes the bag for travel also has room for two discs.
- The main disc compartment has an adjustable divider for the discs.
- Umbrella holder.
- The bag comes with a rain cover that protects all the pockets.
- The large top pocket has a special slot for cell phones.
- The bag has two large plastic ridges along the bottom, reducing the wear and tear of the fabric.
- The inside bottom of the bag has a sheet of plastic protecting it from moisture coming in from the bottom.
- Premium YKK Zippers.

EASY-GO BAG

Are premium backpacks too big for you? The Easy-Go lightweight backpack from Latitude 64° is the answer. The Easy-Go still holds all the essential disc golf gear you need. Ergonomically designed to have a better weight distribution closer to your body. Take it easy! Pack light! Go play!

FEATURES:

- The main storage compartment holds 12 discs in individual sockets.
- Top and bottom compartments are suitable to store towels, clothes, etc. Top compartment can also be used to store an extra 3-4 discs.
- Two 1.5 litre bottle holders at both sides.
- Four elastic side pockets, two at each side. Made to store smaller items like minis, keys or your phone.
- Umbrella holder.
- Premium YKK Zippers.
- The bag comes with a rain cover that protects your gear.

SLIM BAG

This is the bag for players who want something to hold a smaller number of discs. The Slim Bag is good-looking, functional and holds up to 8 discs.

FEATURES:

- Holds up to 8 discs.
- High quality water resistant material.
- Drink holder.
- Comfortable shoulder strap.
- Larger zipper pocket to store valuables.
- An outer putter pocket.
- Latitude 64 logo embroidered on putter pocket.

RETAIL DISPLAY

INDIVIDUAL SLAT WALL AND GRID RACKS ARE AVAILABLE FOR SEPARATE PURCHASE.

RETAIL DISPLAY RACK

The best display option available in the disc golf market, bar none. This easily portable unit can hold 90 discs on each side using the provided disc racks. It can also be configured to hold hang tag items if you prefer. The shelf can fit 2 Pro Bags comfortably or any number of configurations of starter kits, Slim Jim Bags or accessories. Under the shelf there is enough space for two DG Luxury Bags. Unbelievably, all these products can be supported by this one unit that takes up less than 6 sq/ft of floor space. (30"x30") Get this incredibly stylish unit and take your disc golf section to a new level of professionalism.

T-LINK DISC GOLF SHOE

Stay focused under pressure with the T-Link Disc Golf Shoe from Latitude 64°. The rugged, carved antislip outsole gives you confidence both on tee and in terrain. This custom built Disc Golf shoe lets you focus on each shot and wearing it off the course will show the world that you are a Disc Golfer at heart.

Weight: 15.7 oz/444g

FEATURES:

- Triple waterproof protection with Hydroguard water guard lining, plus waterproof treatments on inside and outside upper materials.
- High density antislip rubber outsole for maximum protection against rugged terrain and to reduce the impact on the arch of the foot during outdoor exercise. Carved design at the base give enhanced grip and make the movement easier, maximising performance in hiking, Disc Golfing etc.
- High Quality breathable Phylon EVA insoles for extra comfort, minimising the vibration of each step, reducing fatigue.
- Innovative and ergonomic design for better fit.

LATITUDE 64° CHAIN WEAR SOCKS

Our socks are sold in 3-packs with varying combinations of black and white. Available in S/M (size 7-9) and L/XL (size 10-13). 43% Cotton, 27% Polypropylene, 25% Nylon, 5% Elastane

- Charged cotton footbed featuring traction control.
- Moisture transport system, wicks moisture and accelerate dry time. Embedded arch support helps reduce foot fatigue.
- True seamless toe for ultimate comfort.
- Comfort top delivers secure, comfortable fit.

PROBASKET TRAINER

ProBasket Trainer is a solid quality basket for home use that is easily assembled. Unlike many low priced baskets this has the look and feel of a tournament basket making practice feel like the real deal. It can also be used for temporary courses, where the built in base wheel makes it easy to move. It is PDGA approved for events up to B-tiers.

PROBASKET SKILL

The ProBasket Skill is for players that wants to improve their putting skills. With its narrow profile it will make putting practice hard and fun, but competitions easy when transitioning from the ProBasket Skill to a tournament basket. The low weight, the smaller based mobile foot and divided pole makes this basket easy to move around.
